

SCG validation - Gemini Enterprise for CX - 2026-09-23

Validated file: `_src/geminiCustomerExperienceGuidance.csv` in its final state for 2026-09-23, after the morning update and the review fixes. This report supersedes the post-update validation written earlier the same day. All checks were run programmatically against the file on disk.

Result

Pass - 0 errors. 138 requirements across 12 categories; IDs 10 to 1380, unique, all multiples of 10; 45 rows at Revision 2, 79 at Revision 1, 14 at Revision 0. Risk: 105 High, 31 Med, 2 Low. Directives: 96 MUST, 30 MUST NOT, 10 SHOULD, 2 SHOULD NOT.

#	Check	Result
1	Header matches <code>_scg-scaffold/templates/securityConfigGuidance.csv</code> exactly (17 columns)	Pass
2	Every row has 17 fields; category headings are <code>## <Name></code> followed by 16 empty fields	Pass
3	IDs unique, integer, multiples of 10; flat append-only numbering	Pass
4	Eight downstream columns empty on every data row	Pass
5	ID, Revision, Requirement, Rationale, Risk, Cost, References, and Mappings populated on every data row	Pass
6	Exactly one bolded directive per Requirement; no lowercase must, should, or may; every High row uses MUST or MUST NOT	Pass
7	Risk and Cost limited to High, Med, Low	Pass
8	No non-ASCII bytes, no embedded line breaks	Pass
9	References are live URLs	Pass - 98 of 98 distinct URLs returned HTTP 200
10	Mappings: NIST 800-53 on every row, every identifier and title matching the Rev. 5 OSCAL catalog, parents present for enhancements; segment order HIPAA, NIST 800-53, HITRUST CSF v11, OWASP, others; HITRUST references in dotted notation from the approved list	Pass - 75 distinct NIST controls; HITRUST CSF v11 on 111 of 138 rows (22 distinct references); HIPAA on 114
11	At least one requirement restricting non-GA features	Pass - IDs 10, 20, 30, 40, 50, 740, 1270, 1320, 1350
12	No companion markdown file hard-wraps a rendered paragraph (<code>check_md_wrapping.py</code>)	Pass for every Obsidian file; see the warning on the rendered guidance document
-	No cell references another requirement ID or another SCG	Pass

Requirements per category

Category	Count
General	9
Identity & Access Management	13
Agents & Agent Management	12
AI Models & Model Management	4
Tools & External Integrations	21
Deployment & Channel Security	12
Agent Assist & Human Agent Support	11
Conversation Analytics & Insights	14
Data Protection & Privacy	13

Category	Count
Network & Perimeter Security	10
Monitoring & Analytics	11
Compliance & Certification	8

Warnings

- **HITRUST CSF v11 titles are unverified.** HITRUST is licensed content with no public catalog; confirm the 22 references against the organization's licensed copy before publication.
- **The rendered guidance document is an MkDocs target.** `_src/geminiCustomerExperienceGuidance.md` uses the organization template's MkDocs admonitions (`!!! warning`), whose indented body the Obsidian wrapping checker reports as a wrapped paragraph. That is a false positive for this target, recorded in the Gemini RAG Engine session of the same day.
- **eCFR references** (IDs 300, 1100) return HTTP 200 but present a bot check to scripts; their text was confirmed through the eCFR renderer API.
- **Launch-stage rows are volatile.** IDs 20, 40, 50, 740, 800, 1270, 1320, 1350, and 1360 rest on a Preview, Pre-GA, or unreleased status that can change without a release note.
- **Residual documentation gaps.** The Python code tool sandbox identity (ID 450) and BAA coverage of Google Search grounding (ID 470) remain unconfirmed by Google.
